

Monitoring by passive sampling: spatial and temporal trend assessment

Foppe Smedes

Deltares, Utrecht, The Netherlands

RECETOX, Masaryk University, Brno Czech Republic

NORMAN Inter-Laboratory Study (ILS) on passive sampling of emerging pollutants
DG Joint Research Centre, 29 – 30 October, 2012, Ispra, Italy

Results from a decade monitoring with PS from 2001 - today

Monitoring programme by passive sampling was initiated by the :

National Institute fro Coastal and Marine Management
(RIKZ), The Netherlands,
(dissolved in the Centre for Water Management in 2008)

Started at 8 marine stations in 2001 (+ 6 in rivers from 2009)
6 weeks exposure around November and February
(only November from 2011)

Research centre

in the environment

Norman ILS, DG JRC Ispra, Italy

29-30 october 2012

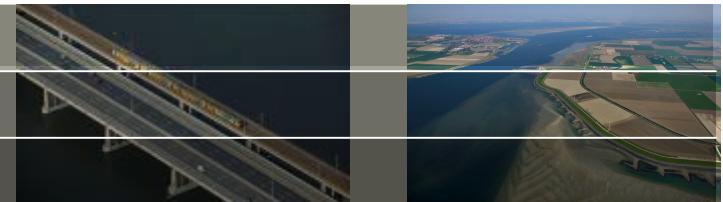

Deltares

Results from a decade monitoring with PS from 2001 - today

- 8 sampling stations (more after 2009)
- 6 weeks exposure around November and February
- Silicone rubber 55x90x0.5 mm (SRPS) –(400-600cm²)
- Pre-ectracted >100 h with ethylacetate
- 4 up to 14 PRC standards ($\log K_{OW}$ 4 - 6.5)
- After recovery store in freezer until processing
- Soxhlet extraction, cleanup Al₂O₃, SiO₂, C18 silica
- PCB's analysed by GC-ECD → GCMS
- PAH's by HPLC and fluorescence detection → GCMS
- Calculation of sampling rates (Ld⁻¹)
- and free dissolved concentrations.

Stations for Passive Sampling

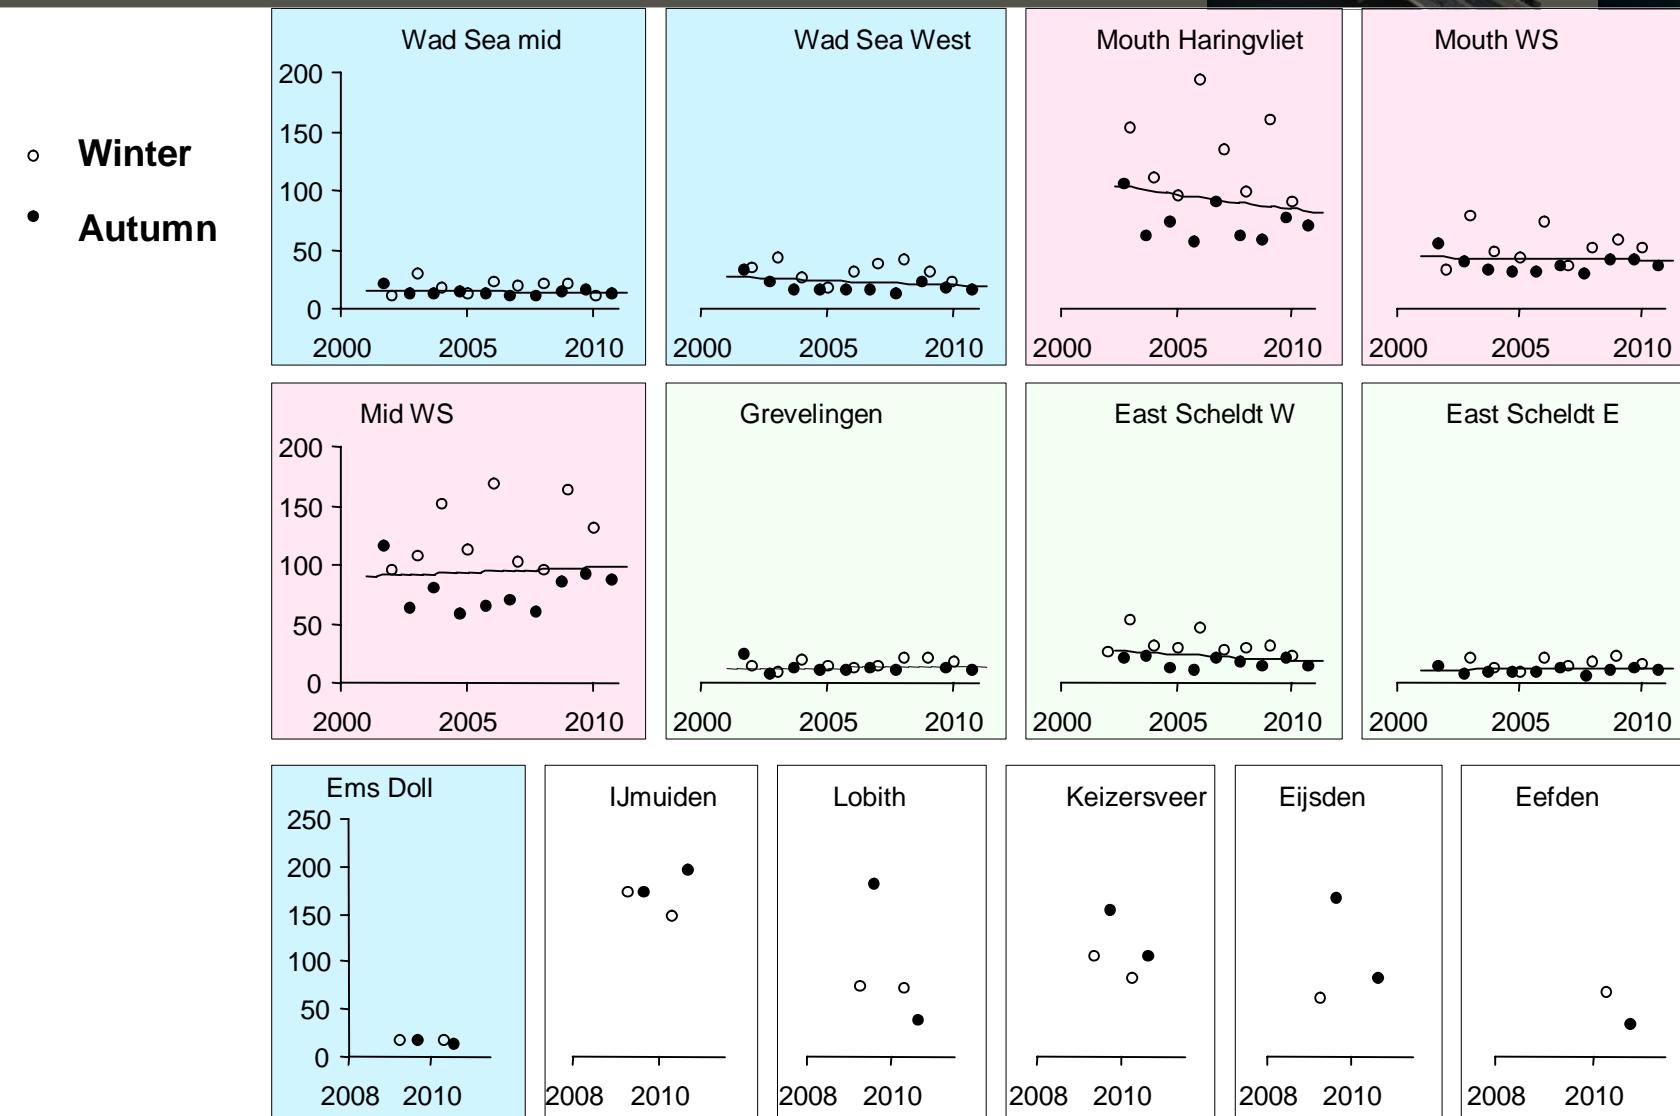

- from 2001
- from 2009

OSPAR/ICES Trial Survey and Intercalibration (PSTS)

Exercise was initiated by two ICES working groups

- Marine Chemistry Working Group
- Working Group on Marine Sediments in relation to pollution

Thirteen laboratories from eleven countries joined,
covering 30 sampling stations.

Pro's of Passive sampling in water

- ✓ Worldwide comparability
- ✓ Different waters
 - Fresh and saline water, toxic, anoxic, porewater
- ✓ Sediment does also work

Con's of Passive sampling

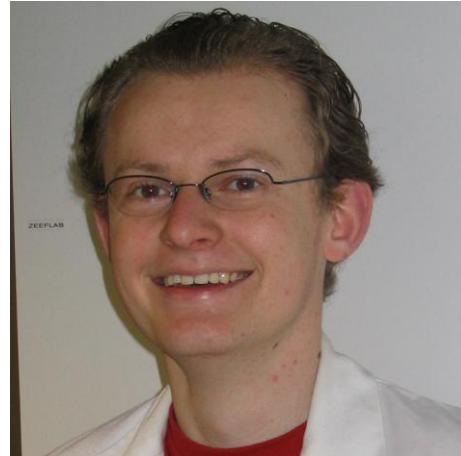

- Secure fixing facilities, buoy required
- Hydro-phobic/philic compounds
 - multiple samplers required
- ~~Dual uptake~~
(a) equilibrium (b) depend on sampling rate measurement
- ~~Bio-fouling, turbulence~~

Any applause should be dedicated to the RIKZ team
